

Digitale DNA

Description

Heute sind wir in der Wissenschaft und Technologie, wo wir Menschen das, was die Natur bereits geleistet hat, verdoppeln und dann verbessern können. Auch wir können das Anorganische in das Organische verwandeln. Auch wir können Genome lesen und interpretieren, aber auch modifizieren. Und auch wir können genetische Vielfalt schaffen, indem wir die beträchtliche Summe dessen, was die Natur bereits hervorgebracht hat, ergänzen.

~ [Dr. George Church](#)

Exzerpt aus dem Buch „Storing Digital Binary Data in Cellular DNA: The New Paradigm“ (2020) p.24

Alle Religionen glauben an Wunder, aber sie kommen zu zufälligen Zeiten, und oft nur nach einem echten Gebet. Gott mit den menschlichen Genen zu spielen ist die Mutter aller Wunder. Das Schneiden und Einfügen von DNA ist ein wahrer "game changer" in der Genrevolution. Die Menschen, die heute in der Genetik forschen, zählen sich zu den Glücklichen. Sie zelebrieren eine neue Technik, die in jeder Hinsicht revolutionär ist.

All religions believe in miracles, but they come at random times, and often only after a genuine prayer. Playing God with human genes is the mother of all miracles. Editing and cutting and pasting DNA is a true "game changer" in the gene revolution. The people who are doing research in genetics today count themselves among the lucky ones. They are celebrating a new technique that is, by all counts, revolutionary. The cause of their uncharacteristic giddiness is a remarkably reliable method of editing the human genome.
